

8motion interactive

think interactif

- **8motion interactive** was founded 8 years ago, based on significant knowledge and experience in the field of touch-screen technology, with the aim to increase sales, facilitate transactions and convey an up to date image to your customers

8motion interactive

- We have pioneered new ideas and created new development opportunities to meet your needs, particularly in the sectors of medicine and wellbeing.

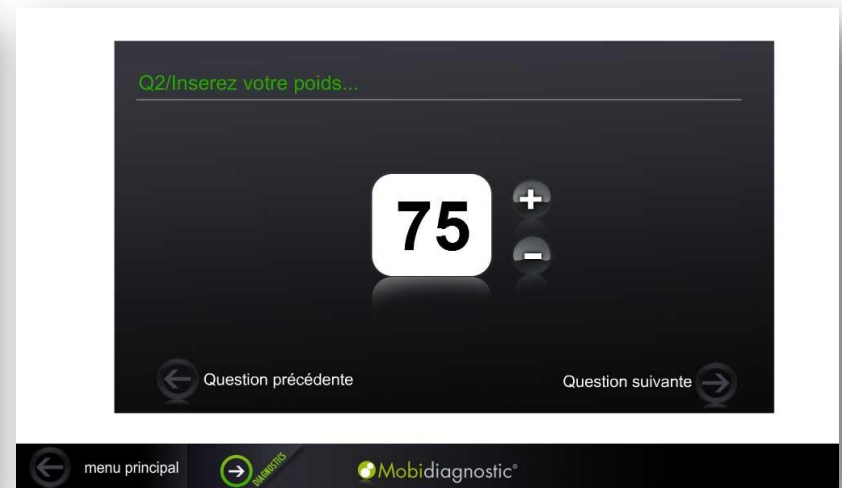

- We are also able to create innovative designs specific to new products and services, as we have already done for BIODERMA, for instance.

- Thanks to our know-how, we can create interactive questionnaires in order to increase sales in several sectors.

- For example, we have set up a partnership **with Orion Concept** and developed an interactive approach that enables our clients to increase their understanding of product efficacy through customer feedback.
